

## How to order Interlocking Sleeves For Your Titan Telescoping Flagpole

- 1) Look at the label on your flagpole which is about chest height.
- 2) It must say "Titan" flagpole somewhere on the label. We do not support other flagpole brands.
- 3) If it says "Titan" on the label, proceed to the diagram below to see which parts you need. Operate your flagpole to see exactly which section does not stay up. There are up to 3 different sizes of interlocking sleeves, so be sure to determine the correct size you need before you place this order. The parts are not returnable. The interlocks are sent to you as a pair, and need to be replaced as a pair. These interlocks have a lifetime parts warranty, so you only pay for shipping. You can call us with any questions.
